WHEN YOU NEED TO BE SURE

TEIL I:

Einleitung und Überblick

1. SGS – ein Überblick
2. SGS – das traditionelle Geschäft
3. SGS – das moderne Geschäft

- Weltweit grösste Inspektions- und Zertifizierungsgesellschaft
- Gegründet 1878 in Rouen
- Hauptsitz in Genf
- 95'000 Mitarbeitende
- 2'400 Büros und Labors in 140 Ländern
- Website www.sgs.com / www.ch.sgs.ch

SGS is the world's leading
inspection, verification, testing
and certification company

Physische Kontrollen vor Ort
von physischen Inhalten
(Produkten und
Managementsystemen)

3. SGS - DAS MODERNE GESCHÄFT

ZERTIFIZIERUNG:

- Die Prozesse und Abläufe sind in den ERP abgebildet; der Anwender kann sie gar nicht mehr nicht umsetzen (installierte Kontrollen etc.).

Problem: Die IT selber sichert die gute Qualität der Prozesse nicht.

- Die Systeme können mit vielen Daten gefüttert werden, welche sich viel gezielter auswerten lassen und somit der kontinuierliche Verbesserungsprozess effizienter angetrieben werden kann.

Problem: Die Daten nützen nichts, wenn sie für den KVP nicht verwendet werden ("Datenfriedhöfe")

3. **SGS** - DAS MODERNE GESCHÄFT

ZERTIFIZIERUNG:

- Fokus auf der Prozessqualität und weniger auf Umsetzung
- Fokus auf dem KVP auf einer viel umfassenderen Datenbasis und einer damit viel gezielteren Auswertung

3. **SGS** - DAS MODERNE GESCHÄFT

ZERTIFIZIERUNG: T-Zertifikat

- Der Mensch ist komplex und die medizinische Qualität eines Spitals lässt sich nicht nur aufgrund von Mortalitätsrate (Sterberate) und Morbiditätsrate (Krankheitshäufigkeit) beurteilen
- Es braucht eine viel differenziertere Datenbasis (-> existierende Register)
- Es braucht eine viel differenzierterer Auswertung der Daten (-> was der heutige Stand der Digitalisierung zulässt)
- Das ermöglicht einen viel differenzierteren KVP -> SGS prüft nur die Datenerfassung/KVP -> viel fokussierterer Betrachtungsrahmen mit viel mehr Hebelwirkung

3. **SGS** - DAS MODERNE GESCHÄFT

INSPEKTION:

Prüfung der Konformität des Produktes mit den gesetzlichen oder den kundenspezifischen Anforderungen:

- Kenntnis der gesetzlichen Anforderungen:

Lösungsangebot SGS: Digicomply (Teil II)

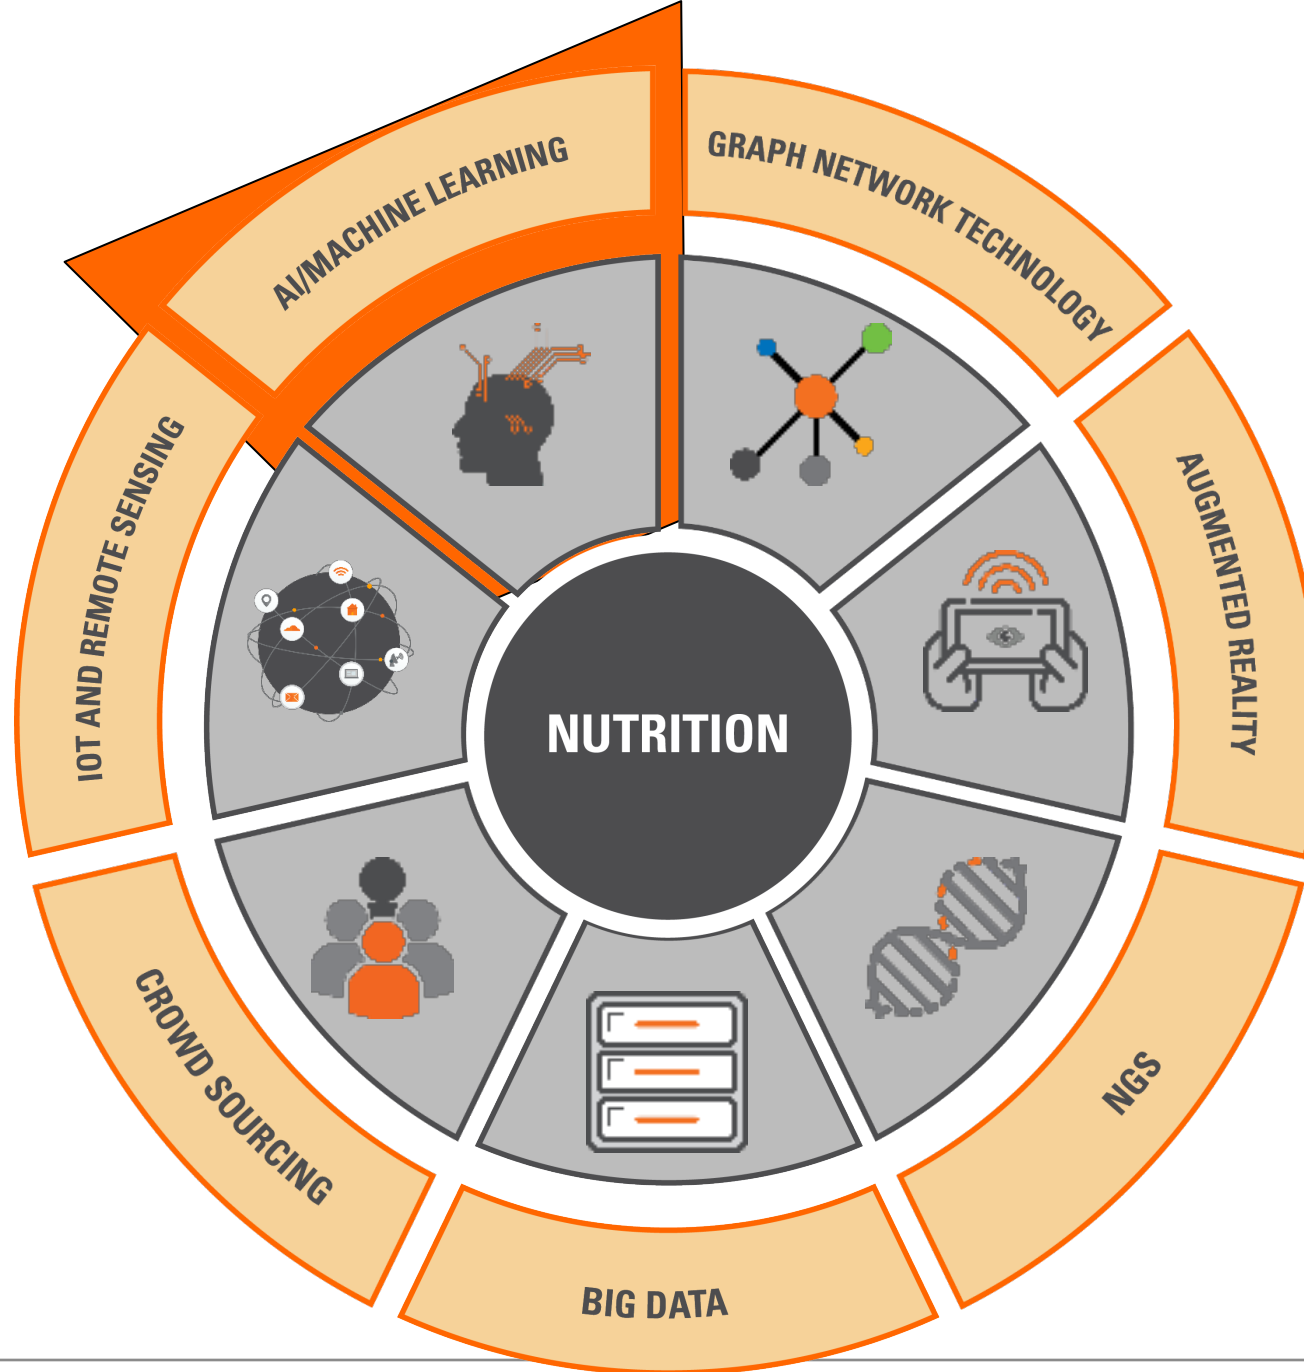

- Prüfung der effektiven Produktqualität:

Lösungsangebot SGS: Remote Inspection via Bildschirm

SGS

Digital Innovation

TEIL II

SGS DIGICOMPLY

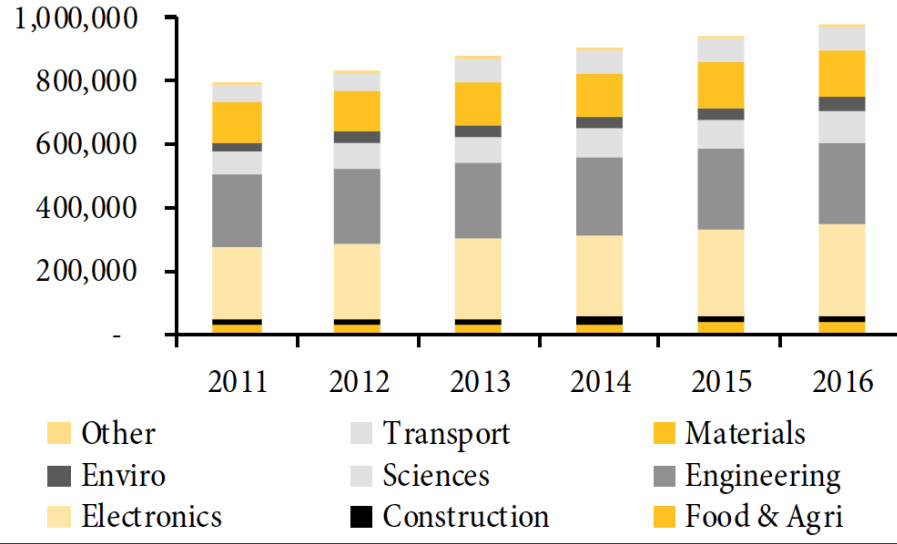

MAKING THE DIFFERENCE

AN INNOVATIVE SOLUTION HELPING YOU TO FIND ANSWERS, DISCOVER FACTS, SIMPLIFY COMPLIANCE PROCESSES

WHEN YOU NEED TO BE SURE

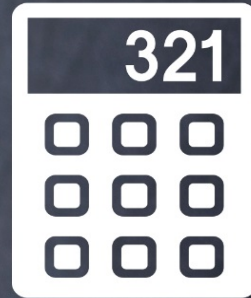

Fig 4: Pages of ISO standards

Source: ISO, Redburn

a Brazilian soybean producer wants to export to the New Zealand market, they must adhere to a rising number of regulations and global standards.

These are often complicated, hard to find and even harder to decipher

REASON

WHY

A close-up photograph of a hand placing a wooden letter 'Y' on a corkboard. The letters 'W', 'H', and 'Y' are already in place, forming the word 'WHY'. The hand is positioned above the 'Y', with fingers gently holding it. The corkboard has a warm, textured appearance, and the lighting is soft, creating a gentle shadow for the letters.
